REPORT SUMMARY

Radio Testing of the
Jotron AS Tron TR30 GMDSS and Maritime VHF Radio
In accordance with IEC 61097-12

1.1 INTRODUCTION

The information contained in this report is intended to show the verification of Radio Testing of the Jotron AS Tron TR30 GMDSS and Maritime VHF Radio to the requirements of IEC 61097-12.

Objective	To perform Radio Testing to determine the Equipment Under Test's (EUT's) compliance with the Test Specification, for the series of tests carried out.
Manufacturer	Jotron AS
Model Number(s)	Tron TR30 GMDSS and Maritime VHF Radio
Serial Number(s)	810 1204 1322
Number of Samples Tested	3
Test Specification/Issue/Date	IEC 61097-12: 1996-11
Incoming Release Date	Application Form 30 March 2016
Disposal Reference Number	Held Pending Disposal
Date	Not Applicable Not Applicable
Order Number	SP1551001
Date	14 December 2015
Start of Test	9 March 2016
Finish of Test	27 September 2016
Name of Engineer(s)	M Russell G Lawler K Bryant N Rousell R Hampton

1.2 BRIEF SUMMARY OF RESULTS

A brief summary of the tests carried out in accordance with IEC 61097-12 is shown below.

Section	Specification Clause	Test Description	Result	Comments/Base Standard
VHF				
2.1	Various	Performance Requirements	-	See section 2.1
2.2	3.3.8.4	Battery Test		
2.3	5.1.5.1	Drop Test	Satisfactory	
2.4	5.1.5.2	Thermal Shock	Satisfactory	
2.5	5.1.5.3	Immersion	Satisfactory	
2.6	5.1.5.4	Dry Heat	Satisfactory	
2.7	5.1.5.5	Damp Heat	Satisfactory	
2.8	5.1.5.6	Low Temperature	Satisfactory	
2.9	5.1.5.7	Vibration	Satisfactory	
2.10	5.1.5.8	Oil Resistance Test	Not Tested	
2.11	5.1.5.9	Solar Radiation	-	Sub-contracted
2.12	5.5.10	Mould Growth	-	Sub-contracted
2.13	5.5.10	Corrosion	-	See section 2.11
2.14	5.4.1	Frequency Error	Pass	
2.15	5.4.2	Effective Radiated Power	Pass	
2.16	5.4.3	Carrier Power	Pass	
2.17	5.4.4.2	Maximum Permissible Frequency Deviation	Pass	
2.18	5.4.4.3	Reduction of Frequency Deviation at Modulation Frequencies above 3 kHz	Pass	
2.19	5.4.5	Limitation Characteristics of the Modulator	Pass	

Section	Specification Clause	Test Description	Result	Comments/Base Standard
VHF				
2.20	5.4.6	Sensitivity of the Modulator, including Microphone	Pass	
2.21	5.4.7	Audio Frequency Response	Pass	
2.22	5.4.8	Audio Frequency Harmonic Distortion of the Emission	Pass	
2.23	5.4.11	Residual Modulation of the Transmitter	Pass	
2.24	5.4.9	Adjacent Channel Power	Pass	
2.25	5.4.10	Conducted Spurious Emissions Conveyed to the Antenna	Pass	
2.26	5.4.12	Transient Frequency Behaviour of the Transmitter	Pass	
2.27	5.5.1	Harmonic Distortion and Rated Audio Frequency Output Power	Pass	
2.28	5.5.2	Audio Frequency Response Rx	Pass	
2.29	5.5.3	Maximum Usable Sensitivity	Pass	
2.30	5.5.4	Co-Channel Rejection	Pass	
2.31	5.5.5	Adjacent Channel Selectivity	Pass	
2.32	5.5.6	Spurious Response Rejection	Pass	
2.33	5.5.7	Intermodulation Response	Pass	
2.34	5.5.8	Blocking	Pass	
2.35	5.5.9	Conducted Spurious Emissions Conveyed to the Antenna Rx	Pass	
2.36	5.5.10	Amplitude Response of the Receiver Limiter	Pass	
2.37	5.5.11	Receiver Hum and Noise Level	Pass	
2.38	5.5.12	Squelch Operation	Pass	
2.39	5.5.13	Squelch Hysteresis	Pass

1.3 APPLICATION FORM

EQUIPMENT DESCRIPTION	
Model Name/Number	Tron TR30 GMDSS and Maritime VHF radio
Part Number	87950
Hardware Version	R1610
Software Version	2.0.2
FCC ID (if applicable)	VRVTRONTR30
Industry Canada ID (if applicable)	2131A-TRONTR30
Technical Description (Please provide a brief description of the intended use of the equipment)	"Tron TR30 GMDSS and Maritime VHF radio" has the ultimate functional design, both in an emergency situation and in general on board communications. The radio switches automatically between standard simplex and duplex maritime channels and 21 emergency simplex channels depending on which battery, rechargeable or sealed lithium, is connected

POWER SOURCE

1.4 PRODUCT INFORMATION

1.4.1 Technical Description

The Equipment Under Test (EUT) was a Jotron AS Tron TR30 GMDSS and Maritime VHF Radio as shown in the photograph below. A full technical description can be found in the manufacturer's documentation.

Equipment Under Test

Product Service

1.5 DEVIATIONS FROM THE STANDARD

No deviations from the applicable test standard were made during testing.

1.6 MODIFICATION RECORD

Modification State	Description of Modification still fitted to EUT	Modification Fitted By	Date Modification Fitted
Serial Number: 810			
0	As supplied by manufacturer.	N/A	N/A
1	Modification of audio amplifier. Updated with circuit which secure below 1W in working radio mode. Modification of TX release, modified audio transient when turn off transmitter with monophone. Squelch open level in max position, changed to opens at sensitivity limit.	Arnt Løke	01/06/2016
2	Adjusted audio response receiver	Arnt Løke	14/07/2016
Serial Number: 1204			
0	As supplied by manufacturer.	N/A	N/A
Serial Number: 1322			
0	As supplied by manufacturer.	N/A	N/A
1	SW version 1.1.3	Jotron	12 August 2016
2	SW version 2.0.2b	TUV	22 August 2016

The table above details modifications made to the EUT during the test programme. The modifications incorporated during each test are recorded on the appropriate test pages.

SECTION 2

TEST DETAILS

Radio Testing of the
Jotron AS Tron TR30 GMDSS and Maritime VHF Radio
In accordance with IEC 61097-12

Product Service

2.1 PERFORMANCE REQUIREMENTS (NUA)

2.1.1 Specification Reference

IEC 61097-12, Clause 3, sub clauses as per Test Results below

2.1.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 1322 – Modification State 1 (SW Version 2.0.2b)

Fist Mic: Not serialised (TUV Ref.: 75933035-TSR0007) – Modification State 0

2.1.3 Date of Test

20 - 23 September 2016

2.1.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1

2.1.5 Test Setup

The EUT was connected to the Fist Mic and tested on a bench under nominal office conditions.

2.1.6 Test Method

The test method used is identified in the “Method” column for each test; definitions are as follows:

Obs.: Observation

Meas.: Measurement

2.1.7 Environmental Conditions

	20 August	21 August	23 August
Ambient Temperature:	20.8 °C	20.5 °C	19.5 °C
Relative Humidity:	70.1 %	68.1 %	46.5 %

Product Service

2.1.8 Test Results

Note: The EUT was configurable either as a GMDSS radio or as a Non-GMDSS radio. The configuration was driven by the selection of battery.

Clause	Requirement - Title Note 1	Requirement - Main extract	Method	Results	Compliance indicated (Y/N)	Comments
3	Performance Requirements	-	-	-	-	
3.1	Introduction	In addition to meeting performance requirements in this clause, the equipment shall comply with the technical characteristics contained in clause 4 of this standard.	-	It is intended that compliance with all clauses can be demonstrated within the present document.	N/T	
3.2	General	-	-	-	-	
3.2.1	(A.809(19) 1/2.1)	The equipment shall be portable and capable of being used for on-scene communication between survival craft, between survival craft and ship and between survival craft and rescue unit. It may also be used for on-board communications when capable of operating on appropriate frequencies.	Obs.	The requirement was met.	Y	

Product Service

Clause	Requirement - Title Note 1	Requirement - Main extract	Method	Results	Compliance indicated (Y/N)	Comments
3.2.2	(A.809(19) 1/2.3)	The equipment shall: 1) be capable of being operated by unskilled personnel; 2) be capable of being operated by personnel wearing gloves as specified for immersion suits in regulation 33 of chapter III of the SOLAS 1974 Convention; 3) be capable of single-handed operation except for channel selection; 9) be of small size and light weight; 10) be capable of operating in the ambient noise level likely to be encountered on board ships or survival craft; 11) have provisions for its attachment to the clothing of the user, including the immersion suit; and 12) be resistant to deterioration by prolonged exposure to sunlight.	Obs.	1) The EUT was simple to use and its controls were laid out in an intuitive manner 2) See also TÜV SUD document 75933035 Report 8 3) All controls were usable single-handedly 9) The requirement was considered to be met 10) The requirement was considered to be met 11) The EUT incorporated a belt clip 12) See Annex A (Solar Radiation report).	Y (L/T)	
3.2.3	(A.809(19) 1/2.3.13)	The equipment shall be either of a highly visible yellow/orange colour or marked with a surrounding yellow/orange marking strip.	Obs.	The EUT was predominantly a bright orange colour.	Y	
3.3	General requirements	-	-	-	-	
3.3.1	Composition (A.809(19) 1/2.2)	The equipment shall comprise at least: 1) an integral transmitter/receiver including antenna and battery; 2) an integral control unit including a press-to-transmit switch; 3) an internal microphone and loudspeaker.	Obs.	The requirement was met.	Y	
3.3.2	Controls and indicators	-	-	-	-	

Product Service

Clause	Requirement - Title Note 1	Requirement - Main extract	Method	Results	Compliance indicated (Y/N)	Comments
3.3.2.1	(A.809(19) 1/4.1)	An on/off switch shall be provided with positive visual indication that the radiotelephone is switched on.	Obs.	The requirement was met. The positive indication was the activation of the LCD screen (and backlight, if active); when the EUT was off the screen was blank.	Y	
3.3.2.2	(A.809(19) 1/4.2)	The receiver shall be provided with a manual volume control by which the audio output may be varied.	Obs.	The requirement was met.	Y	
3.3.2.3	(A.809(19) 1/4.3)	A squelch (mute) control and channel selection switch shall be provided.	Obs.	The requirement was met.	Y	
3.3.2.4	(A.809(19) 1/4.4)	Channel selection shall be easily performed and the channels shall be clearly discernible.	Obs.	The requirement was met.	Y	
3.3.2.5	(A.809(19) 1/4.5)	Channel indication shall be in accordance with appendix 18 of the Radio Regulations.	Obs.	The selectable channels were checked against the Radio Regulations Appendices Edition of 2012 (Appendix 18); they were as follows: 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 67, 68, 69, 71, 72, 73, 74, 77. N.B.: Six additional channels outside of Appendix 18 were available; they were L1, L2, L3, F1, F2 & F3. The channels were not editable by the user, the user manual stated " <i>Your sales representative can program required custom channels, if allowed by local authorities</i> ".	Y (N.B.)	N.B.: See Results
3.3.2.6	(A.809(19) 1/4.6)	It shall be possible to determine that channel 16 has been selected in all ambient light conditions.	Obs.	The requirement was met visually with backlighting enabled in the menu, without backlighting enabled it was not possible to determine visibly however pressing the "16 c" button resulted in audible feedback that the channel had been selected. Even with the key volume set to zero there was still an audible 'pop' upon selecting Channel 16.	Y	
3.3.3	Antenna	-	-	-	-	
3.3.3	(A.809(19) 1/9)	The antenna shall be vertically polarized and, as far as practicable, be omnidirectional in the horizontal plane. The antenna shall be suitable for efficient radiation and reception of signals at the operating frequency.	-	See section 2.15 of the present document. In addition, further ERP measurements can be found in Annex B.	N/T	

Product Service

Clause	Requirement - Title Note 1	Requirement - Main extract	Method	Results	Compliance indicated (Y/N)	Comments
3.3.4	Safety precautions	-	-	-	-	
3.3.4.1	(A.809(19) 1/6)	The equipment shall not be damaged by the effect of open-circuiting or short-circuiting the antenna.	Meas.	<p>The EUT was subjected to the following sequence:</p> <ul style="list-style-type: none">• Set to Channel 16 on high power• Transmit into a short circuit for 130 s*• Transmit into open circuit for 130 s* <p>*Note that the EUT 'timed out' after 130 s of continuous transmission whereupon it stopped transmitting and the user was instructed to "release transmit key"</p> <p>The EUT was then subjected to a Performance Check, results can be found beneath this table.</p>	Y	
3.3.4.2	(A.809(19) 1/2.3.8)	The equipment shall have no sharp projections which could damage survival craft.	Obs.	The requirement was met.	Y	
3.3.5	Frequency bands and channels	-	-	-	-	
3.3.5.1	(A.809(19) 1/3.1)	The two-way radiotelephone shall be capable of operation on the frequency 156,800 MHz (VHF CH 16) and on at least one additional channel.	Obs.	The requirement was met.	Y	
3.3.5.2	(A.809(19) 1/3.2)	All channels fitted shall be for single-frequency voice communication only.	Obs.	<p>The available frequency list (above) was checked against Appendix 18, all stated channels were single frequency.</p> <p>N.B. The custom channels were all set as single frequency however with both Transmit and Receive frequencies listed it would indicate that the setting of two-frequency channels was supported.</p>	Y (N.B.)	N.B.: See Results
3.3.5.3	(A.809(19) 1/3.3)	The class of emission shall be G3E to comply with appendix 19 of the Radio Regulations.	-	See Application Form declaration in section 1.3.	N/T	
3.3.6	Marking and identification	-	-	-	-	

Product Service

Clause	Requirement - Title Note 1	Requirement - Main extract	Method	Results	Compliance indicated (Y/N)	Comments
3.3.6	(A.809(19) 1/13)	In addition to the items specified in resolution A.694(17) on general requirements, as detailed in IEC 945, the following shall be clearly indicated on the exterior of the equipment: 1) brief operating instructions; 2) expiry date for the primary batteries.	Obs.	See TÜV SUD document 75933035 Report 01 (Limited IEC 60945).	Y (L/T)	
3.3.7	Warming-up period	-	-	-	-	
3.3.7	(A.809(19) 1/5)	The equipment shall be operational within 5 s of switching on.	Meas.	A stop watch was used and the time to activate (holding the power button) was 2.0 s and the EUT was usable 1.2 s later for a total time of 3.2 s.	Y	
3.3.8	Power supply	-	-	-	-	
3.3.8.1	(A.809(19) 1/12.1)	The source of energy shall be integrated in the equipment and may be replaceable by the user. In addition, provision may be made to operate the equipment using an external source of electrical energy.	Obs.	The battery was user-replaceable and the system was supplied with two batteries; one primary (GMDSS, non-rechargeable) and one secondary (non-GMDSS, rechargeable). No external power supply was provided but a charging dock was and the EUT was operable with the secondary battery whilst charging.	Y	
3.3.8.2	(A.809(19) 1/12.2)	Equipment intended for the source of energy to be user replaceable shall be provided with a dedicated primary battery for use in the event of a distress situation. This battery shall be equipped with a non-replaceable seal to indicate that it has not been used.	Obs.	As per the above, the requirement was met. The user manual and battery labelling indicated that a seal was normally fitted to the GMDSS battery although one was not present on the tested sample.	Y	
3.3.8.3	(A.809(19) 1/12.3)	Equipment intended for the source of energy to be non-user-replaceable shall be provided with a primary battery. The portable two-way radiotelephone equipment shall be equipped with a non-replaceable seal to indicate that it has not been used.	Obs.	As per the above, the requirement was not applicable.	N/A	

Product Service

Clause	Requirement - Title Note 1	Requirement - Main extract	Method	Results	Compliance indicated (Y/N)	Comments
3.3.8.4	(A.809(19) 1/12.4)	The primary battery shall have sufficient capacity to ensure 8 h operation at its highest rated power with a duty cycle of 1: 9. The duty cycle is defined as 6 s transmission, 6 s reception above squelch opening level and 48 s reception below squelch opening level.	-	See section 2.2 of the present document.	N/T	
3.3.8.5	(A.809(19) 1/12.5)	Primary batteries shall have a shelf life of at least 2 years and if intended to be user replaceable shall be of a colour or marking as defined in 3.2.3.	-	See Annex C. Colour/markings: The GMDSS battery was predominantly a bright orange colour.	Y (L/T)	
3.3.8.6	(A.809(19) 1/12.6)	Primary or secondary batteries not intended for the use in the event of a distress situation shall be of a colour or marking so that they cannot be confused with batteries intended for such use.	Obs.	The non-GMDSS battery was predominantly black.	Y	
3.4	Environmental requirements	[Various]	-	See sections 2.3 – 2.13 of the present document.	-	
3.5	Electromagnetic compatibility	[Various]	-	See TÜV SUD document 75933035 Report 1 (Limited IEC 60945).	-	

Note 1: Requirement title in brackets, e.g. "(A.809(19) 1/2.1)", indicates a reference to IMO Resolutions and ITU Recommendations

L/T: Limited Test

N/A: Not Applicable

N/T: Not Tested

N.B.: Nota Bene - Special notes where qualitative requirements may not have been considered met but alternative interpretations or exceptional circumstances may have precluded declaring the result as non-compliant

The major items of test equipment used for the above tests are identified in Section 3.1.

2.2.5 Environmental Conditions

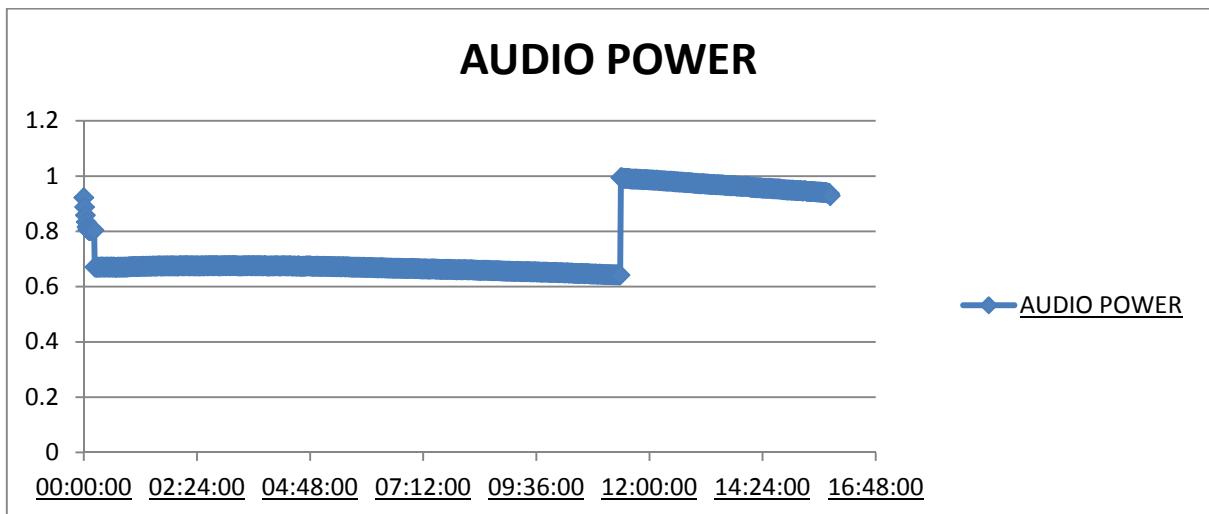

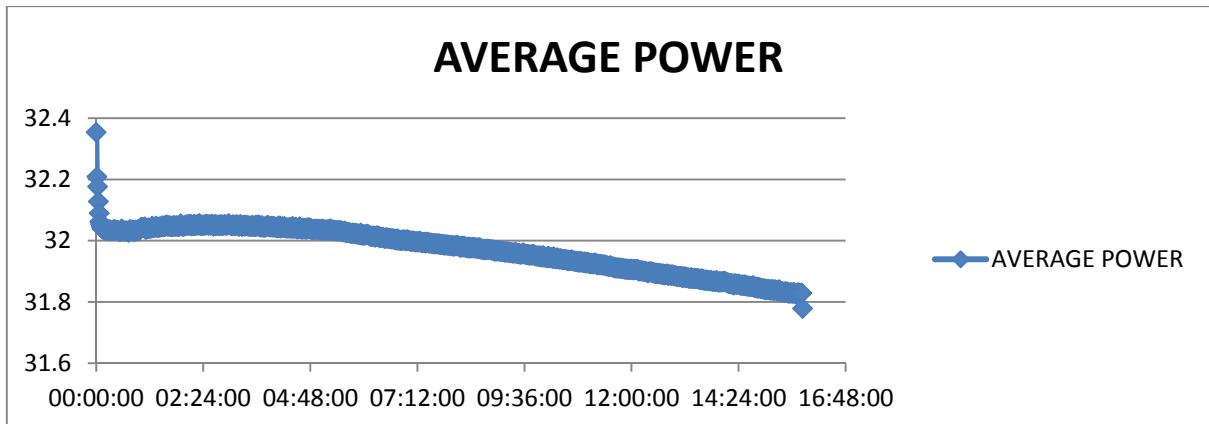

Ambient Temperature	20.6 - 23.6°C
Relative Humidity	51.2 – 69.2%

Product Service

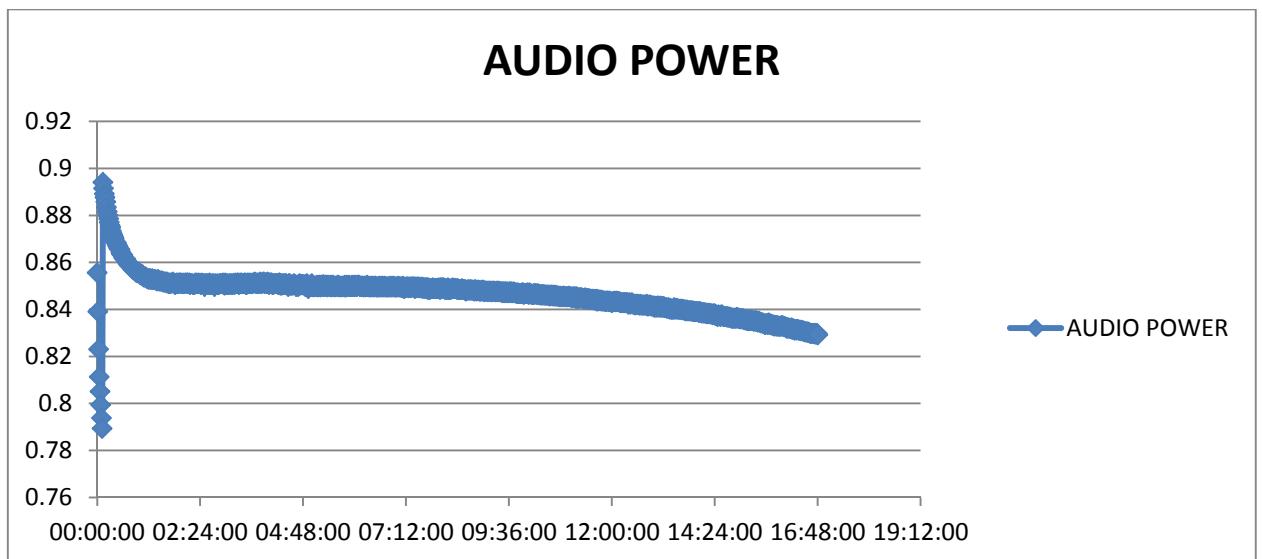

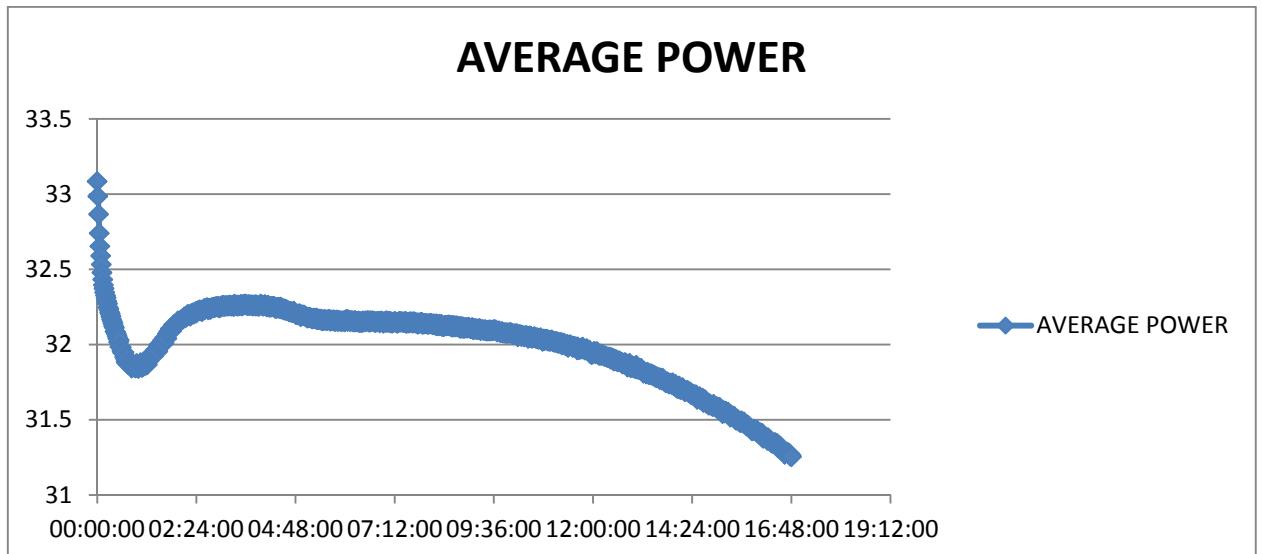

2.2.6 Test Results

Ambient Temperature

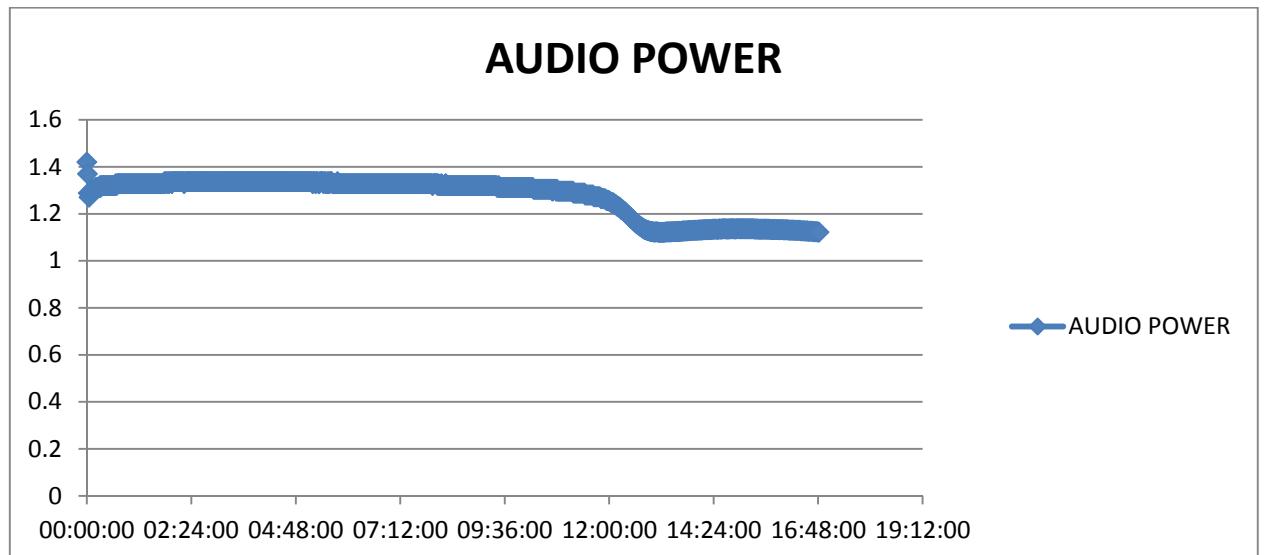

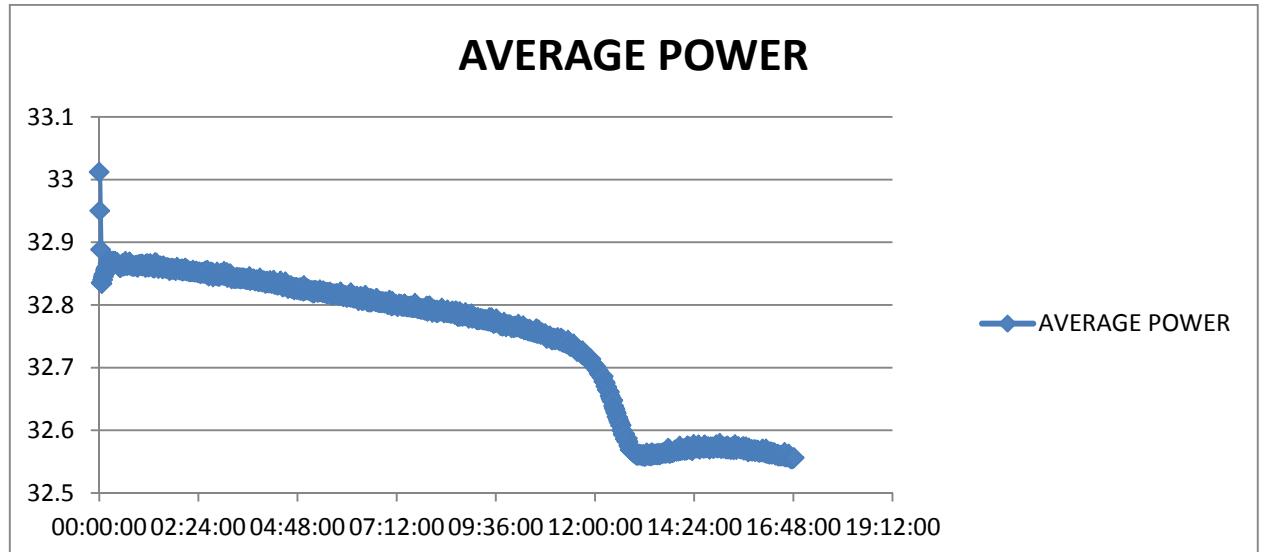

Product Service

Low Temperature

Product Service

High TemperatureRemarks

The battery test was terminated after approximately 16 hours and 45 minutes. At this point the EUT was still compliant with the minimum ERP requirement of 0.25W for all temperature conditions.

After 8 hours the RF power was recorded as 31.98 dBm for ambient conditions. A battery eliminator was then used and the voltage reduced until the same power was measured. This voltage was recorded as 5.97 V DC.

Product Service

Limit Clause 3.3.8.4

The primary battery shall have sufficient capacity to ensure 8 h operation at its highest rated power with a duty cycle of 1: 9. The duty cycle is defined as 6 s transmission, 6 s reception above squelch opening level and 48 s reception below squelch opening level.

2.3.3 Date of Test

9 March 2016

2.3.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.3.5 Environmental Conditions

Ambient Temperature	22.3°C
Relative Humidity	31.8%

Product Service

2.3.6 Test Method

The EUT was dropped 6 times, once on each face of the EUT, from a height of 1 metre onto the test surface. The test surface consisted of a solid piece of hardwood with a minimum thickness of at least 15 cm, and a mass of at least 30 kg.

At the conclusion of the test, the EUT was subjected to a visual inspection and Performance Check.

Setup Photograph

Product Service

2.3.7 Test Results

The test was carried out satisfactorily.

Post Test Performance Check Results

Performance Check: Transmitter frequency error, carrier power and receiver maximum usable sensitivity on Channel 17. The limits are taken from IEC 61097-12, clause 5.1.4.

Transmitter tests are performed with the EUT set to maximum power.

Frequency Error (Hz) Limit: $\leq \pm 1.5$ kHz	Output Power (W) Limit: Between 0.25 - 25 W	MUS(dB μ V(emf)) Limit: $\leq +6$ dB μ V(emf)
63	0.817	-5.5
Visual Inspection: Is there any visible damage or deterioration?		N

ERP was measured on channel 16 as the power on channel 17 is limited.

2.5.5 Environmental Conditions

Ambient Temperature	22.3°C
Relative Humidity	31.8%

Product Service

2.5.6 Test Method

The EUT was placed in a vessel as shown in the setup photograph(s). The unit was immersed to a depth of 1m of water for a period of 30 minutes.

The EUT was weighed before and after the test to indicate if any ingress occurred.

Weight Before (kg)	0.31105
Weight After (kg)	0.31385

The difference in weight was attributed to absorption in the lanyards and trapped in seals and crevices on the EUT.

At the conclusion of the test, the EUT was subjected to a visual inspection and Performance Check.

Setup Photograph

2.9.1 Specification Reference

IEC 61097-12, Clause 5.1.5.7

2.9.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.9.3 Date of Test

21 March 2016

2.9.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.9.5 Environmental Conditions

Ambient Temperature	21.8°C
Relative Humidity	34.6%

2.9.6 Test Method

The EUT was fixed to the vibration table and was subject to the following vibration profiles:

Resonance Sweep

- 5 Hz and up to 13.2 Hz with an excursion of ± 1 mm (7 m/s^2 maximum acceleration at 13.2 Hz);
- above 13.2 Hz and up to 100 Hz with a constant maximum acceleration of 7 m/s^2 .

One sweep was performed at a rate of 0.5 octaves / minute.

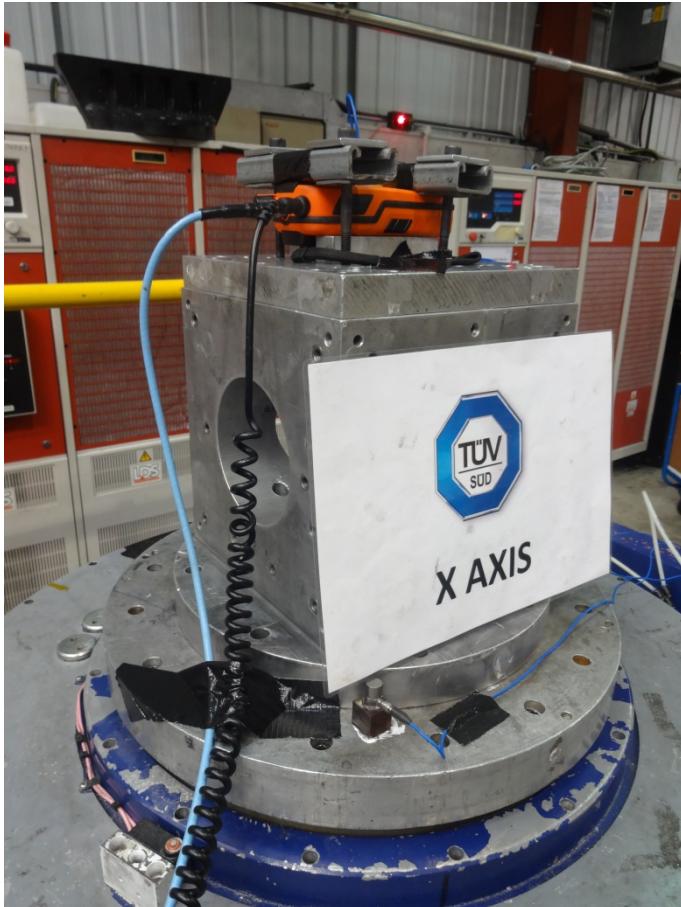

The EUT was subjected to a 2 hour endurance run at 30Hz for each axis as no resonances were detected.

The EUT was subjected to a performance check in each axis. At the conclusion of the test the EUT was inspected for any mechanical degradation.

2.13.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.13.5 Environmental Conditions

Ambient Temperature	23.6°C
Relative Humidity	25.2%

2.13.6 Test Method

The EUT was placed in a chamber and sprayed with a salt solution for 1 h at normal temperature. The salt solution was prepared by dissolving (5 ± 1) parts by weight of sodium chloride (NaCl) in 95 parts by weight of distilled or demineralised water. pH value was confirmed to be between 6.57 and 6.98 at 20 °C ± 2 °C throughout the test.

At the end of the spraying period, the EUT was placed in a chamber which was maintained at a temperature of 40 °C ± 2 °C, and a relative humidity between 90 % and 95 % for a period of seven days.

The EUT was subjected to a test comprising four spraying periods, each of duration 1 h, with a storage period of seven days after each.

At the conclusion of the test, the EUT was subjected to a visual inspection and Performance Check.

Product Service

2.13.7 Test Results

The test was carried out satisfactorily.

Sample composition check data for salt solution:

Check Ref	Salt Solution Concentration (%)	Salt Solution Depositions	Salt Solution pH
1	5.1	1.2ml / 80cm ² / hr	6.57 (at 21.2°C)
4	5.2	1.2ml / 80cm ² / hr	6.98 (at 21.8°C)

Post Test Performance Check Results

Parameter	Result
Visible deterioration or corrosion	See <i>Inspection and Observations</i> below
Evidence of moisture penetration	None Observed
Transmitter Output Power (W)	0.752
Transmitter Frequency Error (kHz)	0.394
Receiver Sensitivity (dBuV emf)	-5.4

Product Service

Inspection and Observations

On completion of the test the EUT was subjected to an inspection. There were signs of some corrosion on some fixings and salt deposits, as shown in the photos below. Additionally, at the end of the performance check the antenna and mic cover was re-attached but whilst tightening the mic cover, the plastic split and became stuck in the mic input.

The manufacturer declared that this deterioration was not an effect of the corrosion test and has supplied a justification letter to support the test report (Annex B).

2.18 REDUCTION OF FREQUENCY DEVIATION AT MODULATION FREQUENCIES ABOVE 3 kHz

2.18.1 Specification Reference

IEC 61097-12, Clause 5.4.4.3

2.18.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.18.3 Date of Test

29 March 2016

2.18.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.18.5 Environmental Conditions

Ambient Temperature	21.8°C
Relative Humidity	30.1%

2.18.6 Test Results

Maximum Rated output power – 2.0 W

6.0 V DC Supply

Modulation Frequency(Hz)	Frequency Deviation
	156.800 MHz
	(kHz)
3000	4.00
4000	3.03
5000	2.05
6000	1.20
8000	0.53
10000	0.33
12000	0.26
15000	0.04
20000	0.04
25000	0.04
Maximum Deviation (kHz)	4.00

Product Service

Limit Clause 5.4.4.3.2

For modulation frequencies between 3 kHz and 6 kHz the frequency deviation shall not exceed the frequency deviation with a modulation frequency of 3 kHz. For a modulation frequency of 6 kHz, the frequency deviation shall not exceed ± 1.5 kHz. For modulation frequencies between 6 kHz and 25 kHz, the frequency deviation shall not exceed that given by a linear response of frequency deviation (in dB) against modulation frequency, starting at the point where the modulation frequency is 6 kHz and the frequency deviation is ± 1.5 kHz and inclined at 14 dB per octave , with the frequency deviation diminishing as the modulation frequency increases.

For frequencies above 6.0 kHz the following table applies:

KHz	6.0	8.0	10.0	12.0	15.0	20.0	25.0
Limit	≤ 1.50	≤ 0.77	≤ 0.46	≤ 0.30	≤ 0.18	≤ 0.09	≤ 0.05

2.19 LIMITATION CHARACTERISTICS OF THE MODULATOR

2.19.1 Specification Reference

IEC 61097-12, Clause 5.4.5

2.19.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.19.3 Date of Test

11 May 2016 & 25 May 2016

2.19.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.19.5 Environmental Conditions

Ambient Temperature	22.3 - 22.5°C
Relative Humidity	32.8 - 65.2%

2.19.6 Test Results

Test Conditions		Frequency Deviation (kHz)
156.800 MHz		
T _{nom} (+22.3°C)	V _{nom} (6.0 V DC)	3.63
T _{min} (-20.0°C)	V _{min} (4.2 V DC)	4.07
T _{max} (+55.0°C)	V _{max} (7.2 V DC)	4.33

Limit Clause 5.4.5.3

The Frequency Deviation shall be between ± 3.5 kHz and ± 5.0 kHz

Product Service

2.20 SENSITIVITY OF THE MODULATOR, INCLUDING MICROPHONE

-------	----------

2.34 BLOCKING

2.34.1 Specification Reference

IEC 61097-12, Clause 5.5.8

2.34.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.34.3 Date of Test

5 May 2016

2.34.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.34.5 Environmental Conditions

Ambient Temperature	23.6°C
Relative Humidity	25.2%

2.34.6 Test Results

6.0 V DC Supply

Frequency of Unwanted Signal	Blocking Level (dB μ V)
	156.800 MHz
Nominal +10MHz	103.0
+5MHz	98.9
+2MHz	98.2
+1MHz	96.7
-1MHz	97.3
-2MHz	99.8
-5MHz	101.0
-10MHz	103.5

Limit Clause 5.5.8.3

Limit	≥ 90 dB μ V
-------	----------------------

Product Service

2.35 CONDUCTED SPURIOUS EMISSIONS CONVEYED TO THE ANTENNA RX

2.35.1 Specification Reference

IEC 61097-12, Clause 5.5.9

2.35.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.35.3 Date of Test

13 May 2016

2.35.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.35.5 Environmental Conditions

Ambient Temperature	23.7°C
Relative Humidity	45.7%

2.35.6 Test Results

6.0 V DC Supply

156.800 MHz

Frequency (MHz)	Emission Result (nW)
*	

*No emissions were detected within a 6 dB margin of the limit.

Limit Clause 5.5.9.3

Frequency range	150 kHz to 1 GHz	1 GHz to 2 GHz
Limit	≤ 2.0 nW (-57.0 dBm)	≤ 20 nW (-47.0 dBm)

2.36 AMPLITUDE RESPONSE OF THE RECEIVER LIMITER

2.36.1 Specification Reference

IEC 61097-12, Clause 5.5.10

2.36.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.36.3 Date of Test

13 May 2016

2.36.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.36.5 Environmental Conditions

Ambient Temperature	20.7°C
Relative Humidity	50.4%

2.36.6 Test Results

6.0 V DC Supply

Channel	Input Level (dB μ V)	Audiofrequency Output Power Level (dB)
156.800 MHz	+6	-12.06
	+100	-12.03
Variation in Audiofrequency Output Power (dB)	0.03	

Limit Clause 5.5.10.3

The variation in Audio frequency Output Power level shall not exceed 3 dB.

2.37 RECEIVER HUM AND NOISE LEVEL

2.37.1 Specification Reference

IEC 61097-12, Clause 5.5.11

2.37.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 0

2.37.3 Date of Test

13 May 2016

2.37.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.37.5 Environmental Conditions

Ambient Temperature	20.7°C
Relative Humidity	50.4%

2.37.6 Test Results

6.0 V DC Supply

Channel	Residual Noise Level (dB)
156.800 MHz	-56.48

Limit Clause 5.5.11.3

Limit	≤ -40 dB
-------	----------

2.38 SQUELCH OPERATION

2.38.1 Specification Reference

IEC 61097-12, Clause 5.5.12

2.38.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 1

2.38.3 Date of Test

5 July 2016

2.38.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.38.5 Environmental Conditions

Ambient Temperature	20.9°C
Relative Humidity	55.7%

2.38.6 Test Results

6.0 V DC Supply

Channel	Clause 5.5.12.2 a)		Clause 5.5.12.2 b)		Clause 5.5.12.2 c)	
	Relative Output Power(dB)		Input Level (dB μ V) emf	SINAD (dB)	Input Level (dB μ V) emf	
156.800 MHz	-100.1		-7.5	27.5	-1.4	

Limit Clause 5.5.12.3

Limit	Clause 5.5.12.2 a)		Clause 5.5.12.2 b)		Clause 5.5.12.2 c)	
	\leq - 40 dB	\leq +6 dB μ V emf	\geq 20dB	\leq +6 dB μ V emf		

2.39 SQUELCH HYSTERESIS

2.39.1 Specification Reference

IEC 61097-12, Clause 5.5.13

2.39.2 Equipment Under Test and Modification State

Tron TR30 GMDSS and Maritime VHF Radio S/N: 810 - Modification State 1

2.39.3 Date of Test

5 July 2016

2.39.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.39.5 Environmental Conditions

Ambient Temperature	20.9°C
Relative Humidity	55.7%

2.39.6 Test Results

6.0 V DC Supply

Channel	Input Level (dB μ V)		Difference (dB)
	Squelch Open	Squelch Closed	
156.800 MHz	-108.5	-113.4	4.9

Limit Clause 5.5.13.3

Limit	Squelch hysteresis shall be between 3 dB and 6 dB

3.2 MEASUREMENT UNCERTAINTY

For a 95% confidence level, the measurement uncertainties for defined systems are:-

Test Discipline	MU
Damp Heat	-
Frequency Error	± 11 Hz
Maximum Permissible Frequency Deviation	-
Reduction of Frequency Deviation at Modulation Frequencies above 3 kHz	-
Sensitivity of the Modulator, including Microphone	± 1.0 dB
Audio Frequency Harmonic Distortion of the Emission	± 1.0 dB
Residual Modulation of the Transmitter	± 1.0 dB
Harmonic Distortion and Rated Audio Frequency Output Power	Distortion: $\pm 14.12\% / -12.62\%$ Audio Power: $\pm 2.84\%$
Adjacent Channel Selectivity	± 2.6 dB
Spurious Response Rejection	± 2.6 dB
Intermodulation Response	± 1.7 dB
Blocking	± 2.6 dB
Squelch Operation	± 0.4 dB
Low Temperature	-
Conducted Spurious Emissions Conveyed to the Antenna	± 2.0 dB
Maximum Usable Sensitivity	± 1.8 dB
Audio Frequency Response Rx	± 2.0 dB
Vibration	-
Audio Frequency Response	± 27.2 Hz
Dry Heat	-
Carrier Power	± 0.45 dB
Adjacent Channel Power	± 3.0 dB
Transient Frequency Behaviour of the Transmitter	± 0.2 kHz
Co-Channel Rejection	± 2.6 dB
Conducted Spurious Emissions Conveyed to the Antenna Rx	± 2.0 dB
Receiver Hum and Noise Level	± 1.8 dB
Squelch Hysteresis	± 1.8 dB
Effective Radiated Power	± 2.92 dB
Limitation Characteristics of the Modulator	± 0.5 dB
Amplitude Response of the Receiver Limiter	± 0.5 dB

Solar radiation test

Assignment

Simulated solar radiation test according to EN 300225 clause 7.10 / IEC 61097-12 clause 5.1.5.9, for 80 hours. Visual assessment after exposure.

Test specimen

Name	Description	Quantity
87087	Tron TR30 Rechargeable LiPo 1550 mAh	1
870860	Tron TR30 Emergency GMDSS battery	1
87101	Tron TR30 GMDSS Assembly	1
	Piece of cable with connector and clip	1

The test specimens were delivered to SP on June 7, 2016.

Test procedure

The test specimens were exposed in an *Atlas Suntest XXL+*. The xenon light source in the Weather-Ometer was filtered to correspond to daylight; this means that the light reaches a lower limit at 290 nm. The light intensity was $60 \pm 6 \text{ W/m}^2$ within the band pass 290–400 nm, $550 \pm 55 \text{ W/m}^2$ within the band pass 290–800 nm and $1300 \pm 130 \text{ W/m}^2$ within the band pass 290–3000 nm.

**REPORT**

Date 2016-07-05 Reference 6P05223

Page 2 (3)

The air temperature was 55 ± 2 °C and the black standard temperature (BST) was about 80 ± 2 °C. The relative humidity was 50 ± 5 %.

The exposure was carried out between June 28 and July 1, 2016.

Test results*Visual assessment*

The visual assessment after the exposure showed no changes such as deformation, cracking, stratification, buckling, ungluing of plastic pieces, degradation of readability of inscriptions and signs on the instrument scale.

Functionality test after the exposure

The Tron TR30 was checked after 72 hours (weekend), the display was readable and the sound of the radio was ok.

Skoppum: 21.09.2016

Declaration IEC 61097-12 Clause 3.2

Jotron AS hereby declare according to the international standard IEC 61097-12, that our Tron TR30 GMDSS and Maritime VHF Radio meets the requirements of 3.2 general performance requirements.

Our Tron TR30 GMDSS and Maritime VHF Radio comes with a belt clip and a hand strap making the radio compliant to:

Clause 3.2.2 The equipment shall:

- Be capable of being operated by unskilled personnel.
- Be capable of being operated by personnel wearing gloves as specified for immersion suits in regulation 33 of chapter III of the SOLAS 1974 Convention.
- Be capable of single-handed operation except for channel selection.
- Be of small size and light weight.
- Be capable of being operated in the ambient noise level likely to be encountered on board ships or survival craft.
- Have provisions for its attachment to the clothing of the user, including the immersion suit.
- Be resistant to deterioration by prolonged exposure to sunlight.
